“V-Spy” The Video-Surveillance system of last generation

V-Spy is a video system surveillance anti intrusion that it demands truly little in order to work, one power supply and one SIM card of a whichever mobile telephone operator. It works easy in independent way and at the occurrence integrates itself easily with a preexisted alarm system.

It permits to watch a room automatically activating itself to the survey of persons by means of an Infrared sensor integrated or an external sensors preexisted in the room, to manage the acquisition of scenes shot in real time, its storage on a Memory - Card, the contemporary shipment of the scenes shot by means of MMS message to one or more mobile phone qualifies or also to one or more e-mail addresses.

The GSM-GPRS technology of the four Bands V-Spy system is able to the reception of a simple SMS, to activate the shipment of a MMS containing from one simple photo (JPG format) to a complete scenes shot comprehensive of audio and video (MP4 or 3GP), in every moment and from whichever place! It is concurred therefore to examine the room in which it is installed: box, warehouses, offices, windows, if the children are to house and other more, when wished and fastly.

The Memory - Card allows to the V-Spy system of being a DVR (Digital Video Recorder) to be able to recording audio and video in efficient way, giving the possibility to see again the historian of the recordings with a reader of common audio/video format 3GP or AVI.

The portability of the V-Spy system is assured from the contained dimensions that, joined to battery power of it make an instrument ideal also to control your vehicles, car, camper, vans, taxi, public bus that private.

(*) The expansibility of the V-Spy system is possible with added of one extension card, to be able to increasing the functionalities which: IP-camera, Input/output Audio, USB-OTG Memory, room control temperature, 4 photo-coupled Inputs and 4 strong loadable Outputs.

Functions:

Sensors – Infrared, vibration, room noise, Temperature, 2 (+4)* inputs Photo-coupled.
Remote Controls – 2 rooling-code 433MHz On/Off/Anti-panic (programmable).
Alarms – SMS / MMS / e-mail, (4 Relays)*
Storage – Audio/Video / Photo on SD/MMC – Card / (USB - Key)*.
Listen – Room bi-directional.

Specifications:

CPU – ARM9 with OS Linux 2.6.18
SYS Memory – 64 Mb(SDRAM) 32 Mb(FLASH).
Memory Card Size – 2 GByte max.
Consumption – 12 V / 500 mA max.
Dimensions – 160 x 96 x 50 mm.
Battery – 4.8 V / 4 Ah - NiMH.
Weight – 700 gr.
